Automatic Delivery

Automatic delivery is a service we provide to ensure you do not run out of heating oil when you need it most. We use an algorithm to monitor your usage, so you don't have to. Our calculations are based on 3 factors:

1. Heating Degree Day- Measures how much energy is needed to heat a home based on the outside temperature. The degree day changes daily, therefore the number of days that can lapse between your deliveries will change daily.
2. Past Usage & Tank Size - We use data from previous deliveries to determine your usage habits. For example, someone works from home all day.
3. Insulation & Home Efficiency - Every home is different. Older homes with older furnaces will use more fuel than a neighbor with a new house or updated equipment.

Reclaiming The Past To Power The Future

Lehigh Fuels Customers Sign up for AP&L's Residential Electric Service

- 5% of your generation charges are credited back to your heating oil account for any future oil purchase!
- You are guaranteed a lower price per kilowatt hour than the PPL price to compare.
- Program available to all Lehigh Fuels customers for Residential service only.

Easy Pay Budget Plan

Our Easy Pay/Budget Plan estimates your total annual heating bill and divides your payments equally over the course of the year. Rather than having expensive bills during the middle of the winter, you can have more moderate bills equally spaced throughout the year. Customers are taking advantage of this payment method because it helps keep the family budget manageable.

Fixed Price Plan

Our Fixed Price Program is an option to pay once (or spread out your payments over 6 months) for the entire heating season with the added convenience of automatic delivery.

Your Options... How it works:

1. Choose which plan works best for you.
2. Complete and sign the enclosed contract related to the plan you choose.
3. If you are choosing a fixed price plan you will need to enclose a check for the deposit.
4. Retain a copy of your contract for your records.
